PERSONAL PROJECTS

MovieGayan

- MovieGayan is an exciting personal project that showcases the power of React JS and various hooks, states, and reusable components. The application allows users to view and search for movies, providing them with an immersive experience.
- Use of the "useEffect" hook and the "fetch" API, which fetches data from an external API and updates the app's state accordingly
- The MovieCard is a reusable component, which displays information about individual movies. This component is customizable and can be used in various contexts within the app, enhancing its reusability and making it easier to maintain.

Entertainment Blog - Theshowbies [🔗](#)

- My personal website is a WordPress blog where I share my thoughts on the entertainment world
- During development of this website, I learned about Wordpress, Google analytics, google search console, Bing search console, Yandex
- I regularly update it with new content and features. The website monthly visitors is gradually increasing, and I have received positive feedback from readers and fellow bloggers

Restaurant Menu Page [🔗](#)

- Developed a restaurant menu page that filters through the different food menus. helped customers to choose restaurant menus digitally and payment same ways by avoiding direct physical contact

Personal portfolio website [🔗](#)

- This is my personal portfolio website by using HTML, CSS, Javascript. Which I developed to showcase my work. and I have hosted it on netlify.
